

## Environmental Policy Statement

SD Systems recognises that in carrying out its activities we have a responsibility to our customers, employees and the general public to minimise our environmental impact during our operations. We are committed to the integration of environmental considerations into our business decisions.

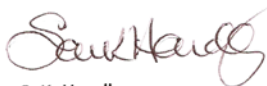

The environmental policy of SD Systems is to:

- comply with legal requirements and codes of practice
- promote environmental awareness and commitment to the policy among our stakeholders
- minimise waste and increase recycling procedures where possible
- reduce the effects of noise, dust and inconvenience arising from our activities
- promote environmentally responsible purchasing
- identify and manage environmental risks and hazards
- use water and energy efficiently, minimising its use where possible
- respond appropriately and timelessly to any complaints from third parties

To ensure compliance and attainment of the above objectives this policy sets out the responsibility to all managers and employees to ensure:

- understanding of the policy objectives and clarity as to their implementation
- consider environmental impact at all stages of work activities engaged
- participate in reporting procedures for environmental improvement opportunities

Overall this policy is the responsibility of the Board of Directors of SD Systems and is subject to annual review and update as necessary to take account of legal and best practice amendments.
